

## Available options to start your panel review

As the Vancouver Division begins the development of Patient Medical Homes and Primary Care Networks throughout Vancouver, one of the first steps for members is a fulsome Panel Review of your patients. At present, the GPSC has allocated \$6,000/ physician for the panel review process.

**Practice Support Program:** PSP Coordinators support Physicians and MOAs through the Panel Management process. This starts with a discussion about the importance of Panel Management, a review of the current state of the practice panel, and guided support to the development of a documented panel management process and sustainability plan. Your Practice Support Coordinator can work with you to determine which panel support process would work best for you including connections and collaboration with Panel Assistants and "Just Practice"; GPSC funded supports that can complete the hands on clean-up of your panel.

**Panel Assistants:** Panel Assistants, hired by the GPSC, can meet with you to undertake a panel review, and, directed by you, can make the necessary changes in your EMR.

**Just Practice:** Formerly JMJ Medical are contracted by the GPSC to conduct a panel review electronically and make necessary changes to your panel electronically, directed by you.

**Note:** Time commitment for any of the supports are dependent on the availability of the practice for initial meetings, panel recommendation reviews, action plans, and timely follow up.

This process can be funded through the GPSC Panel Management incentive which starts with the physicians indicating a commitment to complete the Panel Management workbook and completion of Patient Medical Home assessment.

PSP, Panel Assistants, and Just Practice collaborate to provide the right support needed for your practice to develop a documented process for your continued sustainment of a panel maintenance plan.

Every door is the right door!
