

Priorities or first steps:

- Abuse, driving, cognitive disorder, polypharmacy

Resources/Services:

- Race Line
- STAT center
- Geriatric assessment

Questions/Concerns/Limitations:

- How long does it take to hear back from Roadsafe?
- What's at neighborhood houses?
- STAT center is a program for physical + cognitive decline, extremely hard to access
- How to figure out if it's medicine induced?
- What stage do you have to register blood thinners?
- Dementia complicates the case

Case assumptions:

- Meds cause confusion in elderly
- Trouble w/ middle son
- You can't take away all meds at once
- Polypharmacy as a focus break in between priorities
- Kids need to be interviewed
