

Priorities or first steps:

- Goals of care, caregiver burnout, isolation, declining physical, frailty, capacity, financial, depression w/ weight loss

Case assumptions:

- Assuming relation, would want to explore that
- Wouldn't assume he wants to be there
- Known him for a long time
- Office setting clinical visit
- Not going to use HandyDART, too much labor required to book in advance

Questions/Concerns/Limitations:

- How fast can you access VCH Older Adult MH
- Who's the boss?
- 4 month timeline
- Takes too long to get a case manager, requires follow-up to get one
- Language barrier
- Is the daughter still able to support other tasks
