# IPT Engagement Series: Exploring PCN Clinical Pharmacy

March 12<sup>th</sup>, 2025

# Physician Testimonials

Dr. Daniel Dodek  
Well Health

*Working with the PCN pharmacist has improved my professional wellbeing and improved patient outcomes with their health. The pharmacist has **helped my diabetes patients by explaining how and when to take medications.** She has helped me in **clinical decision making** with which 2 or 3rd line diabetes medication to prescribe; this saves my patient waiting months for a consult with an endocrinologist and improves my patient's diabetes. My **patients appreciate the quality time the pharmacist spends with them providing education on COPD, hypertension or heart failure.** I have personally improved my knowledge on how to manage chronic pain through my work with the pharmacist. **My experience is more than consulting with a pharmacist; it is a partnership and supporting one other on a team.***

# Physician Testimonials

Dr. Gideon Liknaitzky  
Well Health

*As a practicing physician, I have consistently seen significant value of having a clinical pharmacist integrated into my patient care team. Amneet's **in-depth knowledge of medications, ability to identify potential drug interactions, and expertise in medication adherence counseling** have demonstrably improved patient outcomes, allowing me to focus on more complex medical issues while knowing my patients are receiving optimal drug therapy management.*

*On a more personal note, Amneet's professionalism, responsiveness, and attention to detail makes any interaction with her an absolute delight. The collegiality enjoyed through our interactions not only enhances patient care, but also my personal job satisfaction on a daily basis. Having had the good fortune to work closely with Amneet for a number of years now, I would battle to do without her. I know I speak for my patients too, who cannot say enough good things about the superb and caring service she provides.*
